CONTENTS

VOLUME 52 NUMBER 1 (Published 29 June 1990) JULY 1990

1. PHOTOMORPHOGENESIS IN PLANTS

Richard E. Kendrick 1 Introduction

Articles

Masayoshi Nakasako, Masamitsu Wada, Satoru Tokutomi, Kotaro T. Yamamoto, Jun Sakai, Mikio Kataoka, Fumio Tokunaga and Masaki Furuya 3 Quaternary structure of pea phytochrome I dimer studied with small-angle X-ray scattering and rotary-shadowing electron microscopy

Gudrun Hermann, Max E. Lippitsch, Harald Brunner, Franz R. Aussenegg and Eberhard Müller 13 Picosecond dynamics of the excited state relaxations in phytochrome

Claudio G. Colombano, Silvia E. Braslavsky, Alfred R. Holzwarth and Kurt Schaffner 19 Fluorescence quantum yields of 124-kDa phytochrome from oat upon excitation within different absorption bands

Carol K. Clugston, Linda K. Barnett, Nigel A. R. Urwin and Gareth I. Jenkins 23 Photoreceptors controlling transcription of *rbcS* genes in green leaf tissue of *Pisum sativum*

D. Ernst, A. Apfelböck, A. Bergmann and C. Weyrauch 29 Rhythmic regulation of the light-harvesting chlorophyll *a/b* protein and the small subunit of ribulose-1,5-bisphosphate carboxylase mRNA in rye seedlings

J.-W. Kelimann, E. Pichersky and B. Piechulla 35 Analysis of the diurnal expression patterns of the tomato chlorophyll *a/b* binding protein genes. Influence of light and characterization of the gene family

Maria Cuozzo-Davis, Mun-Heng Yong, Philip M. Gilmartin, Elisabeth Goyvaerts, Cris Kuhlemeier, Laura Sarokin and Nam-Hai Chua 43 Minimal sequence requirements for the regulated expression of *rbcS-3A* from *Pisum sativum* in transgenic tobacco plants

Lin Sun and Elaine M. Tobin 51 Phytochrome-regulated expression of genes encoding light-harvesting chlorophyll a/b-protein in two long hypocotyl mutants and wild type plants of *Arabidopsis thaliana*

W. Haupt 57 Phytochrome-mediated fern-spore germination: inhibition by elevated temperatures

K.-J. Appenroth and H. Augsten 61 Photophysiology of turion germination in *Spirodela polyrhiza* (L.) Schleiden—V. Demonstration of a calcium-requiring phase during phytochrome-mediated germination

C. J. Haas and R. Scheuerlein 67 Phase-specific effect of nitrate on phytochrome-mediated germination in spores of *Dryopteris filix-mas* L.

S. Dürr and R. Scheuerlein 73 Characterization of a calcium-requiring phase during phytochrome-mediated fern-spore germination of *Dryopteris paleacea* Sw.

Béla Böddi, Agneta Lindsten, Margareta Ryberg and Christer Sundqvist 83 Phototransformation of aggregated forms of protochlorophyllide in isolated etioplast inner membranes

Ekkehard Schönbohm and Ulrike Czeska-Werner 89 The stimulating effect of a cold, dark pretreatment on the etioplast/chloroplast transformation of angiosperms—II. Synergism between red-light and cold pretreatment on the CO_2- and O_2-gas-exchange of wheat leaves

Kiriakos Kotzabasis, Mathias Senge, Britta Seyfried and Horst Senger 95 Aggregation of monovinyl- and divinyl-protochlorophyllide in organic solvents

R. Schmid, R. Fromme and G. Renger 103 The photosynthetic apparatus of *Acetabularia mediterranea* grown under red or blue light. Biophysical quantification and characterization of photosystem II and its core components

F. López-Figueroa and W. Rüdiger 111 A possible control by phytochrome and other photoreceptors of protein accumulation in the green alga *Ulva rigida*

Heidemarie Oelze-Karow and Hans Mohr	115	Phytochrome-mediated threshold control of hypocotyl growth in partly de-etiolated mustard (*Sinapis alba* L.) seedlings
Andrzej Tretyn and Richard E. Kendrick	123	Induction of leaf unrolling by phytochrome and acetylcholine in etiolated wheat seedlings
Harry Smith	131	Phytochrome action at high photon fluence rates: rapid extension rate responses of light-grown mustard to variations in fluence rate and red:far-red ratio
E. López-Juez, W. F. Buurmeijer, G. H. Heeringa, R. E. Kendrick and J. C. Wesselius	143	Response of light-grown wild-type and long hypocotyl mutant cucumber plants to end-of-day far-red light
Steven J. Britz	151	Photoregulation of root:shoot ratio in soybean seedlings
Zhe Tong, Tai Wang and Yang Xu	161	Evidence for involvement of phytochrome regulation in male sterility of a mutant of *Oryza sativa* L.
Jorge J. Casal, Garry C. Whitelam and Harry Smith	165	Phytochrome control of extracellular peroxidase activity in mustard internodes: correlation with growth, and comparison with the effect of wounding
G. F. Deitzer and S. H. Frosch	173	Multiple action of far-red light in photoperiodic induction and circadian rhythmicity
Nobuko Hamasaki and Arthur W. Galston	181	The polyamines of *Xanthium strumarium* and their response to photoperiod
Dov Koller and Tamar Shak	187	Light-driven movements in the solar tracking leaf of *Lupinus palaestinus* Boiss. (Fabaceae)
G. Roblin, P. Fleurat-Lessard, A. Everat-Bourbouloux, J. Bonmort and C. Moyen	197	Phytochrome- and blue pigment-mediated leaf movements: experimental approach in the signal transduction
Ekkehard Schönbohm, Elfriede Schönbohm and Jens Meyer-Wegener	203	On the signal-transduction chains of two Pfr-mediated short-term processes: increase of anchorage and movement of *Mougeotia* chloroplasts
C. Fischer and M. Kraml	211	Action spectrum for photoreversion of the active Pfr-fraction of *Mougeotia in vivo*
J. Ruiz-Herrera, G. Martinez-Cadena, C. Valenzuela and G. Reyna	217	Possible roles of calcium and calmodulin in the light-stimulation of wall biosynthesis in *Phycomyces*
M. Morales and J. Ruiz-Herrera	223	Light-induced changes in the vesicular apparatus of *Phycomyces* sporangiophores during the phototropic response
Research Note		
S. Baroncelli, B. Lercari, F. Cecconi and C. Pugliesi	229	Light control of elongation of filament in sunflower (*Helianthus annuus* L.)
Review Articles		
Paul Galland	233	Phototropism of the *Phycomyces* sporangiophore: a comparison with higher plants
Bal Ram Singh and Pill-Soon Song	249	Phytochrome and protein phosphorylation
Commentaries		
R. D. Firn	255	Phototropism—the need for a sense of direction?
Wolfgang Haupt	261	Signal transduction in photomorphogenesis

2. YEARLY REVIEW

Ken-ichi Tomizawa, Akira Nagatani and Masaki Furuya	265	Phytochrome genes: studies using the tools of molecular biology and photomorphogenetic mutants

VOLUME 52 NUMBER 2 (Published 31 July 1990) AUGUST 1990

PHOTOCHEMISTRY SECTION

Articles

Frederick D. Lewis, Theodore L. Field and Michal Sabat 277 Molecular structure and photodecarbonylation of 2,3,4,5-tetraphenylcyclopentanone

D. Aeby, E. Eichenberger, E. Haselbach, P. Suppan, P. Guerry and R. Neier 283 Photophysics and photochemistry of 4-dihydropyridinones

Alexander P. Darmanyan and Igor V. Khudyakov 293 Study of luminescent forms of the uranyl ion

Beatrice Alpha, Roberto Ballardini, Vincenzo Balzani, Jean-Marie Lehn, Siglinda Perathoner and Nanda Sabbatini 299 Antenna effect in luminescent lanthanide cryptates: a photophysical study

Akira Haraguchi, Yoshiro Yonezawa and Ryotaro Hanawa 307 Spectral sensitization of SnO_2 thin film electrode by the J-aggregate of cyanine dyes in monolayers

PHOTOBIOLOGY SECTION

Rapid Communication

F. P. Gasparro, R. Dall'Amico, M. O'Malley, P. W. Heald and R. L. Edelson 315 Cell membrane DNA: a new target for psoralen photoadduct formation

Articles

Pei-gen Sheng, J. Feix and B. Kalyanaraman 323 Characterization of radical adducts formed during photochemical spin trapping in liposomes

J. R. Wagner, J. E. van Lier and L. J. Johnston 333 Quinone sensitized electron transfer photooxidation of nucleic acids: chemistry of thymine and thymidine radical cations in aqueous solution

J. M. Bruce, N. J. F. Dodd, A. A. Gorman, I. Hamblett, C. W. Kerr, C. Lambert and S. P. McNeeney 345 Anthralin-derived transients—II. Formation of the radical by spontaneous fragmentation of both singlet and triplet states of the 10,10′-dehydrodimer: radical pair multiplicity effects

Magdalena M. Szafran, Jacek Kozioł and Paul F. Heelis 353 Hydrogen bonding and phototautomerism of 3-methyllumichrome

I. Baraldi, M. C. Bruni, M. P. Costi and P. Pecorari 361 Theoretical study of electronic spectra and photophysics of uracil derivatives

B. J. Tromberg, A. Orenstein, S. Kimel, S. J. Barker, J. Hyatt, J. S. Nelson and M. W. Berns 375 *In vivo* tumor oxygen tension measurements for the evaluation of the efficiency of photodynamic therapy

Jennifer G. Peak and Meyrick J. Peak 387 Ultraviolet light induces double-strand breaks in DNA of cultured human P3 cells as measured by neutral filter elution

In Soon Choi, Jae Bum Kim, Kee Nyung Lee and Sang Dai Park 395 Characterization of *RAD4* gene required for ultraviolet-induced excision repair of *Saccharomyces cerevisiae* propagated in *Escherichia coli* without inactivation

Research Note

Geoffrey Searle, Seymour S. Brody and Arie Van Hoek 401 Evidence for the formation of a chlorophyll *a*/zeaxanthin complex in lecithin liposomes from fluorescence decay kinetics

Review Articles

Vincenzo Balzani and Roberto Ballardini 409 New trends in the design of luminescent metal complexes

G. Blasse 417 The influence of the ligands on the luminescence of metal ions

Alessandra Andreoni 423 Time-resolved luminescence spectroscopy of photosensitizers of biomedical interest

R. Stephen Davidson and Martin M. Hilchenbach 431 The use of fluorescent probes in immunochemistry

Giulio Jori 439 Photosensitized processes *in vivo*: proposed phototherapeutic applications

VOLUME 52 NUMBER 3 (Published 1 August 1990) SEPTEMBER 1990

Articles

Klaus Müller, Richard C. Kanner and Christopher S. Foote 445 Kinetic studies on anthralin photooxidation

Gareth R. Jones, M. Elizabete Oliveira and Robert B. Cundall 451 The interactions of pyrenylmethyl tributylphosphonium bromide with single strand polynucleotides

Andree Kirsch-De Mesmaeker, Guillermo Orellana, Jacqueline K. Barton and Nicholas J. Turro 461 Ligand-dependent interaction of ruthenium(II) polypyridyl complexes with DNA probed by emission spectroscopy

P. Douglas, G. Waechter and A. Mills 473 Ionic strength effects on the ground state complexation and triplet state electron transfer reaction between Rose Bengal and methyl viologen

Kristian Berg, André Western, Jerry C. Bommer and Johan Moan 481 Intracellular localization of sulfonated meso-tetraphenylporphines in a human carcinoma cell line

G. J. S. Fowler, R. C. Rees and R. Devonshire 489 The photokilling of bladder carcinoma cells *in vitro* by phenothiazine dyes

Anna M. Richter, Elizabeth Waterfield, Ashok K. Jain, Ethan D. Sternberg, David Dolphin and Julia G. Levy 495 *In vitro* evaluation of phototoxic properties of four structurally related benzoporphyrin derivatives

Beth A. Allison, P. Haydn Pritchard, Anna M. Richter and Julia G. Levy 501 The plasma distribution of benzoporphyrin derivative and the effects of plasma lipoproteins on its biodistribution

O. I. Kovalsky, I. G. Panyutin and E. I. Budowsky 509 Sequence-specificity of the alkali-sensitive lesions induced in DNA by high-intensity ultraviolet laser radiation

Hugo J. Niggli 519 Comparative studies on the correlation between pyrimidine dimer formation and tyrosinase activity in Cloudman S91 melanoma cells after ultraviolet-irradiation

Ronald D. Snyder and Prasad S. Sunkara 525 Effect of polyamine depletion on DNA damage and repair following UV irradiation of HeLa cells

M. Palumbo, F. Baccichetti, C. Antonello, O. Gia, A. Capozzi and S. Marciani Magno 533 Photobiological activity of 3,4′-dimethyl-8-methoxypsoralen, a linear furocoumarin with unusual DNA-binding properties

S. Salmon, J. C. Maziere, R. Santus, P. Morliere and N. Bouchemal 541 UVB-induced photoperoxidation of lipids of human low and high density lipoproteins. A possible role of tryptophan residues

Willem Star, Jeanne Versteeg, Wim van Putten and Hans Marijnissen 547 Wavelength dependence of hematoporphyrin derivative photodynamic treatment effects on rat ears

Narayani Ramakrishnan, Marian E. Clay, Libby R. Friedman, Antonio R. Antunez and Nancy L. Oleinick 555 Post-treatment interactions of photodynamic and radiation-induced cytotoxic lesions

Jin Jung, Hee-Jung Kim and Moonjae Cho 561 Action spectra for the generation of singlet oxygen from mitochondrial membranes from soybean (*Glycine max*) hypocotyls

Rinaldo Cubeddu, Francesco Ghetti, Francesco Lenci, Roberta Ramponi and Paola Taroni 567 Time-gated fluorescence of blepharismin, the photoreceptor pigment for photomovement of *Blepharisma*

P. Hegemann, K. Neumeier, U. Hegemann and E. Kuehnle 575 The role of calcium in *Chlamydomonas* photomovement responses as analysed by calcium channel inhibitors

Duane A. Graves, Ginger M. Spradlin and Elias Greenbaum 585 Effect of oxygen on photoautotrophic and heterotrophic growth of *Chlamydomonas reinhardtii* in an anoxic atmosphere

Ora Canaani 591 The role of cyclic electron flow around photosystem I and excitation energy distribution between the photosystems upon acclimation to high ionic stress in *Dunaliella salina*

Research Notes

A. Seret, M. Hoebeke and A. Van de Vorst 601 Triplet yield of Merocyanine 540 in water is wavelength dependent

Madeline M. Netto, Stephen P. A. Fodor and Richard A. Mathies 605 Ultraviolet resonance Raman spectroscopy of bacteriorhodopsin

Review Article

Diwu Zhenjun and J. William Lown 609 Hypocrellins and their use in photosensitization

Photobiology School

Marye Anne Fox 617 Photoinduced electron transfer

Book Review 629

VOLUME 52 NUMBER 4 (Published 31 August 1990) OCTOBER 1990

PHOTOCHEMISTRY SECTION

Articles

Wolfgang Hetterich and Horst Kisch 631 Heterogeneous photocatalysis—VII. The influence of zinc ions on the photocatalytic properties of platinized cadmium sulfide

Prabir K. Chatterjee and S. E. Webber 637 Biphotonic chemistry of phenanthrene under 308 nm excimer laser irradiation

Research Note

David I. Schuster, George E. Heibel, Richard A. Caldwell and Wei Tang 645 Determination of triplet excitation energies of cyclic enones by time-resolved photoacoustic calorimetry
